You can also email: jedwards@hha.org

Office Hours: By appointment

Goal: Physical Education class is an introduction to exercise and wellness for all levels of learners. The study of PE is designed to show thematic connections between a variety of physical activities including movement, and wellness activities. The aim of this course is to increase students' knowledge of the different physical activities, while continuing to cultivate a lifelong value of exercise. Some of the topics that will be covered while continuing online learning include yoga, stretching and the importance of exercise to stay healthy.

Diversity Statement: I believe in equity, justice, and inclusion for all. In PE we study team building and sportsmanship dynamics which really involve a collaboration for success. In this class we celebrate diversity as a strength and resource for creativity and community. Students may not always feel comfortable as they take brave risks and tackle creative challenges, but I place great emphasis on making PE class a safe space for ALL students to experience these important growth opportunities.
